BEFORE SIGNING THIS FORM PLEASE READ AND INITIAL THE FOLLOWING: The purpose of the test is to determine whether you have Sickle Cell Anemia, Sickle Cell Trait, or any other detectable unusual type of hemoglobin. Taking blood samples from an arm or finger can detect any of these conditions by protein chemistry tests or DNA analysis (if needed). The risks are minimal (small). If you participated at a designated clinic or received a referral to the center from your physician the results will be placed in you medical records unless you refuse. All self-referral or walk-in clients will receive results in complete confidence. We will notify Meharry self-referral or walk-in clients of their test results and offer genetic counseling.
